

Date August 2026

Subject National Immunisation Campaign

Dear <naam contactpersoon>,

The GGD Amsterdam - Public Health Service's National Immunisation Campaign for Amsterdam and Amstelland will run from September 1 to November 27, 2026. Children aged eight and above will be offered vaccinations against MMR, HPV, or Meningococci, and sometimes for combinations of these vaccinations.

How will this affect you?

Children will get their vaccinations at a location nearby. Whenever possible, these appointments will be outside school hours (from 13:00 to 20:00). In some cases, however, children may have to miss lessons. We ask for your understanding in this matter.

Information for parents

Would you help us get in touch with parents? That would enable them to obtain information in time to make an informed choice. At your school, our nurse has an information pack containing ready-made news items that you can share with parents, by publishing an item in the school's newsletter, for example.

Further information

You can find frequently asked questions and more information at <https://www.ggd.amsterdam.nl/vaccineren>. If you have any other questions, please contact us via <https://www.ggd.amsterdam.nl/ggd/contact/jeugdgezondheidszorg/>.

Kind regards,

GGD Amsterdam - Public Health Service
